National Tsing Hua University (NTHU)	International Master Program in Information Systems and Applications	Research carried out in IMPISA is divided into two major groups: (A) Human-centered computing and (B) Bioinformatics. Group A consists of a wide spectrum of studies in the field of information systems, including embedded computing, information and network security, AI, audio and image processing, data mining, social networks, human-computer interaction, and natural language processing. Group B is a young and thriving research group in IMPISA, focusing on research related to bioinformatics.
